Osage Nation Health System Earns Outstanding Financial Audit Results

Pawhuska, OK – The Osage Nation Health System (ONHS) has successfully completed its annual financial statement audit, earning a "clean audit"—a distinction praised as highly uncommon, particularly during its transition as a separate Tribal Business Enterprise.

The audit, which reviewed both business and healthcare operations, was also a key requirement for securing the bank loan on the new Wahzhazhe Health Center Clinic. Auditors commended ONHS for its financial excellence, transparency, and strong fiscal management.

“The results reflect our team’s dedication to accountability and high standards,” said Mark Rogers, ONHS Chief Executive Officer.

The Osage Nation Health Board and Executive Team extend their appreciation to the Finance and Accounting Office for their outstanding work in ensuring financial integrity and supporting the Health System’s continued growth.
